Chief Engineer (Roads) office
Pune Municipal Corporation

PMC Urban Street Design CELL

Road Department, Pune Municipal Corporation

Pune Municipal Corporation (PMC) has adopted **Urban Street Design Guidelines** to promote public transport, walking, cycling, and placemaking, thereby enhancing the safety, accessibility, and vibrancy of urban streets in Pune. Accordingly, all works related to road infrastructure shall be planned, designed, and scrutinized by the Road Department to ensure that the development and improvement of streets adhere to these guidelines.

For the effective implementation of these initiatives, PMC intends to hire the following professionals for the **Planning Cell under the Road Department**.

1. Junior Urban Designer (7 Posts)

These positions shall report to the **Superintending Engineer (Road Department), respective Executive Engineer (Road), and Transport Planner (Road)**.

Pune Municipal Corporation is seeking motivated and hardworking professionals with a strong understanding of **sustainable transportation, street design, and public realm improvements**.

Responsibilities

The responsibilities under this position shall include, but are not limited to, the following:

- Preparing plans, CAD drawings, detailed design drawings, presentations, and explanatory graphics for projects assigned by the Superintending Engineer (SE) and respective Executive Engineer (EE).
- Supporting the scrutiny and review of drawings submitted to the Planning Cell under the Road Department, including projects related to **BRT, NMT corridors, public spaces, pedestrian plazas/zones, riverfront development, canal development, Development Plan line demarcation, and similar urban infrastructure projects**, in accordance with **Pune Urban Street Design Guidelines** and relevant standards.
- Reviewing all drawings from the perspective of **universal accessibility and inclusive design**.
- Suggesting design improvements or modifications in submitted drawings and coordinating with concerned stakeholders to incorporate revisions.
- Assisting in the **monitoring and supervision of projects on-site**, including BRT, NMT, Metro integration, and other road infrastructure projects, from a design and implementation perspective.
- Providing inputs and solutions to **on-site design challenges** in projects related to Metro integration, BRT corridors, NMT infrastructure, and street design.
- Coordinating with various departments within PMC, Traffic Police, NGOs, consultants, and citizens to resolve implementation-related issues.

- Supporting preparation of **design proposals, concept plans, and urban design strategies** for streets, public spaces, and mobility corridors.
- Assisting in new initiatives undertaken by PMC for improving **city mobility, walkability, cycling infrastructure, and public realm design**.
- Undertaking any other work related to **city transport, street design, and urban mobility projects** as assigned by the Superintending Engineer, Road Department.

Qualifications

The preferred qualifications for this position are as follows:

- Master's Degree in **Urban Design, Landscape Design, Urban Planning, Architecture, or related fields** with minimum 5 years of relevant professional experience.
- Prior experience in **street design, Metro/BRT/NMT planning and design, public bicycle sharing (PBS), road design, public space design, pedestrianization projects, or similar urban design assignments** in India cities especially Pune region will be preferred.
- Proficiency in relevant software such as **AutoCAD, MS Office, Adobe Suite, and 3D modelling/visualization tools**.
- Ability to work effectively in a **fast-paced environment and manage multiple assignments with minimal supervision**.
- Strong organizational, analytical, and communication skills.
- Ability to work collaboratively with multidisciplinary teams and officials at different levels.
- Fluency in **English and Hindi**; knowledge of **Marathi** will be preferred.

Salary

As mentioned in the advertisement published for this post.

2. Senior Urban Designer (2 Posts)

These positions shall report to the **Superintending Engineer (Road Department), PMC**, and shall guide the work of the Urban Street Design Planning Cell.

PMC is looking for experienced professionals with strong expertise in **urban street design, public realm design, sustainable mobility planning, and Transit-Oriented Development (TOD)**.

Responsibilities

The responsibilities under this position shall include, but are not limited to, the following:

- Providing **technical leadership and strategic guidance** for urban street design initiatives undertaken by the Road Department.
- Leading the **review and scrutiny of street design proposals, corridor improvement plans, and public space designs** prepared internally or by consultants to ensure compliance with **Pune Urban Street Design Guidelines and National best practices**.

- Providing design oversight for projects related to **BRT corridors, NMT infrastructure, Metro integration, pedestrian zones, public spaces, riverfront and canal development, and complete streets initiatives.**
- Ensuring that road and mobility infrastructure projects are aligned with **Transit-Oriented Development (TOD) Guidelines, sustainable mobility principles, and integrated land-use and transport planning.**
- Supporting the preparation of **urban design frameworks, street design concepts, and corridor-level improvement plans** for major mobility corridors in the city.
- Guiding the **Planning Cell team, including Junior Urban Designers,** in preparing design proposals, drawings, presentations, and technical documentation.
- Reviewing design submissions from consultants and contractors and recommending improvements to ensure **high-quality design and implementation.**
- Coordinating with various departments within PMC, MahaMetro, Traffic Police, planning authorities, consultants, and other stakeholders to ensure **integrated project planning and implementation.**
- Supporting capacity building within PMC by contributing to **design guidelines, standard drawings, manuals, and knowledge documentation** related to urban street design.
- Assisting PMC in initiating and implementing **new mobility and public realm improvement projects** aimed at improving walkability, cycling infrastructure, and overall urban livability.

Qualifications

The preferred qualifications for this position are as follows:

- Master's Degree in **Urban Design, Landscape Architecture, Urban Planning, or related fields** with **minimum 10 years of professional experience** in urban design and related fields.
- Strong experience in **street design, complete streets, NMT planning, Metro/BRT integration, public space design, and Transit-Oriented Development (TOD)** projects in India cities.
- Experience in **reviewing design proposals, managing multidisciplinary teams, and coordinating with government agencies** will be preferred.
- Proficiency in **design and visualization software such as AutoCAD, Adobe Suite, and 3D modelling tools.**
- Strong **leadership, communication, analytical, and project management skills.**
- Fluency in **English and Hindi;** knowledge of **Marathi** will be preferred.
